

Care & Maintenance of Italian Terracotta

A NATURAL MATERIAL

Terracotta brings warmth, softness, and quiet variation to a space. Each tile is crafted from natural clay, with tonal shifts and surface character that evolve beautifully over time.

INSTALLATION & FINISHING

As with most natural materials, terracotta is prepared and finished during the installation process.

The process is typically:

- Lay the tile
- Grout them
- Wash the surface using an acid wash or builders wash
- Seal the tile once clean and dry

WHERE TO USE

Terracotta is suitable for a wide range of applications, including:

- Indoor living areas
- Kitchens
- Bathrooms and wet areas
- Outdoor spaces

Its versatility makes it well suited to both interior and exterior settings, while maintaining the warmth and character of a natural material.

DAY-TO-DAY CARE

- Clean with a pH-neutral cleaner
- Avoid harsh or acidic products in regular maintenance
- Wipe spills as they occur
- Use gentle cleaning methods to preserve the finish over time

TERRACOTTA OVER TIME

Like all natural materials, terracotta will settle into its environment and develop character with age.

- Resealing may be required periodically depending on use and exposure
- Gentle maintenance will help keep the surface looking its best

A NOTE ON VARIATION

Variation in colour, texture, and markings is inherent to terracotta and part of its appeal.

Each batch carries its own unique character, ensuring every installation feels individual.
